

Basic Medical performed on Adult Dogs

When they arrive:

Vanguard Plus 5 + L4 (Parvo/Distemper/Leptospirosis)

Bordatella (Kennel Cough)

Flea Preventative

Heartworm Test

Heartworm Preventative

Dewormers

Spay or Neuter

Microchip

Two weeks after arrival they need:

Booster for Vanguard Plus 5 + L4 (Parvo/Distemper/Leptospirosis)

Booster for Bordatella (Kennel Cough)

Dewormer

Four weeks after arrival they need:

Flea preventative

Heartworm Preventative (if negative result on test)

Note: Adopters can return for the two week step if adopted before they are due! Once adopted the new owner cannot use All4Paws for further medical needs. They need to establish their pet with their new veterinarian.

Some dogs will require medications and treatment beyond these treatments but this is the baseline that everyone receives while in our care!

If placed on medication for any reason, you are expected to administer as directed during their stay with you. Medications will be oral or topical! Please return any remaining medication upon return of the foster pet.
